

The screenshot shows the VS Code interface with a file explorer on the left containing `index.js` and `dataStore.json`. The `dataStore.json` file is open in the editor, displaying the following JSON content:

```
1 [{"Name":{"FirstName":"Tharun"},"Age":{"currentAge":"20"}}]
```

The console on the right shows the following output:

```
1.Create 2.Read 3.Delete 4.Exit
Enter your choice : 1
Enter the Key : Name
Enter the Value : Tharun
{ Name: { FirstName: 'Tharun' } }
1.Create 2.Read 3.Delete 4.Exit
Enter your choice : 1
Enter the Key : Age
Enter the Value : 20
{ Name: { FirstName: 'Tharun' }, Age: { currentAge: '20' } }
1.Create 2.Read 3.Delete 4.Exit
Enter your choice : []
```

This screenshot is identical to the first one, but the console output now includes an additional line at the bottom:

```
1.Create 2.Read 3.Delete 4.Exit
Enter your choice : 2
{ Name: { FirstName: 'Tharun' }, Age: { currentAge: '20' } }
1.Create 2.Read 3.Delete 4.Exit
Enter your choice :
```

The file can be read from the console.
